Think Pharmacy First..

Did you know that your local pharmacy can now help treat a range of common health conditions without you needing to see a GP? Through the Pharmacy First service, trained pharmacists can provide advice and, where appropriate, prescribe treatment for conditions such as sore throats, sinusitis, earache, infected insect bites, impetigo, shingles and uncomplicated urinary tract infections (UTIs) in women. If you have one of these conditions, consider visiting your local pharmacy first – it's a quick and convenient way to get the care you need while helping GP appointments remain available for patients with more complex health concerns.

Recent Updates:

Autumn Flu & Covid Campaign

Flu vaccinations for eligible children and pregnant women are due to start from 1 September, with the main adult flu and COVID-19 vaccination programme beginning from 1 October. This year's COVID-19 vaccine will be offered to people aged 75 and over, residents in older adult care homes, and people aged 6 months and over who are immunosuppressed. The flu vaccine will be available to a wider range of eligible patients, including people aged 65 and over, pregnant women, those with certain long-term health conditions, carers, care home residents, and eligible children. If you're eligible, we'll contact you with details of how to book your vaccination in the coming months.

New website coming soon.....

We're pleased to let you know that our practice website will soon be getting a fresh new look! The new website has been designed to be more modern, easier to navigate and more user-friendly, making it quicker and simpler to find the information you need.
